

Academic Regulations

B.Tech. Computer Science & Engineering • NMAMIT, Nitte

Scope and source status

This document summarizes verified academic regulations for the B.Tech. Computer Science and Engineering framework published by NMAMIT/Nitte. The accessible detailed regulations below are from the official 2023–27 CSE regulations PDF. NMAMIT's CSE page also publishes a separate official 2024–28 CSE syllabus/regulations source; that Google Drive document was not text-accessible through the public web reader, so this document does not silently treat unverified 2024–28 wording as fact.

Attendance

- Minimum attendance is 85% in each subject, with provision for the Principal to condone 10% for stated reasons such as medical grounds, university-level sports/cultural activities, seminars, workshops and paper presentations.
- Attendance is calculated using the institution's academic-calendar term; for first-semester students it is reckoned from the date of admission.
- Students are to be informed of their attendance position in the first week of every month.
- If attendance is below 75% in a registered course, the student is not permitted to appear for SEE in that course and receives an 'N' grade. The course must be re-registered when offered again.

Credits and degree completion

- The B.Tech. program is structured around 160 credits for the full program in the cited regulations.
- A course is successfully completed and credits are earned with an acceptable letter grade in the O–P range; an F grade means no credits are earned for that course.
- The regulations describe SGPA and CGPA as credit-weighted measures of semester and cumulative performance.
- For award of the B.Tech. degree, the cited regulations require the prescribed program credits and a minimum CGPA of 5.0 within the allowed completion period.

Grading

Marks	Grade point	Letter	Descriptor
90% and above	10	O	Outstanding
80–89%	9	A+	Excellent
70–79%	8	A	Very Good
60–69%	7	B+	Good
55–59%	6	B	Above Average
50–54%	5	C	Average
40–49%	4	P	Pass
0–39%	0	F	Fails / Non-compliance
Absent	0	AB	Absent

Academic probation and progression

- All students are promoted to the next semester/year irrespective of academic performance.
- If CGPA falls below 5.00, the student is placed on Academic Probation and may register for a maximum of 16 credits in subsequent semesters until the CGPA crosses 5.0; the regulations also allow re-registration for F/N

courses.

- For regular first-year entrants, normally at least 85% of credits should be completed by the end of the 7th semester. At least 122 credits are required for submission of the B.Tech. Major Project in the 8th semester.
- The cited regulations provide an 8-year maximum duration for regular entrants and require 160 credits plus minimum CGPA 5.0; separate limits apply to lateral-entry students.

Backlogs / failed courses

- There is no routine re-examination for a course. Students with N/F/W or specified non-completion situations must re-register and complete CIE/SEE again when the course is offered in a main or summer semester.
- Students who have satisfied attendance and CIE but receive F in SEE may appear in subsequent backlog examination(s) without repeating attendance/CIE, subject to the stated rules.
- Not all courses are necessarily offered in the summer semester; offering depends on institutional resources.
