

# Internship Guidelines

B.Tech. • NMAMIT, Nitte • Verified source summary

## Mandatory Internship-I

- Internship-I is mandatory for students admitted to the first semester of engineering programs.
- Duration: 2 weeks (about 80–90 hours) during the first year, involving inter/intra-institutional activities.
- A viva-voce/presentation with question-answer is conducted in the specified semester, and the prescribed credit is included in the IV-semester grade card in the cited regulations.
- Internship-I is a head of passing and is considered for award of the degree. Non-completion requires completion in a subsequent examination cycle after satisfying the requirements.
- Students submit the report immediately after completion to the respective mentor. Internship-I is assessed for 100 CIE marks and has no SEE in the cited scheme; the marks are split as 25 + 25 for presentations and 50 for report/final presentation.

## Internship-II

- Internship-II is mandatory and totals 8 weeks during the second and third years.
- The cited CSE curriculum specifies a societal internship component of 2 weeks (80–90 hours) plus a 6-week research/industry internship (240–270 hours), or an 8-week research/industry internship (320–360 hours), completed in one/two stretches during vacation periods between IV and VII semesters.
- The curriculum places Internship-II in the VIII-semester structure with 8 credits.
- Internship may be undertaken in an industry, R&D; organization, government organization, or other reputed organization/institution recognized for the purpose by the University.

## Registration, supervision and documents

- The internship is registered as a curriculum requirement/course under the applicable scheme.
- A faculty coordinator/mentor monitors progress and guides successful completion.
- The cited rules explicitly require an internship report for Internship-I; local internship office/department instructions may additionally require offer/acceptance letters, attendance or completion certificates, logbooks and employer evaluation. Those additional document requirements should be taken from the current department notice rather than assumed.
- For project/internship work, the final report and presentation/oral examination are evaluated according to the applicable project/internship scheme.

### Important data-quality note

The official 2024–28 CSE syllabus/regulations is linked by NMAMIT, but the linked Google Drive file was not text-readable in the public web reader used for this compilation. Therefore, the detailed Internship-I/II figures above are taken from the accessible official CSE regulations PDF and should be cross-checked against the 2024–28 department document before being treated as the authoritative rule for the 2024 cohort.
